

SCS Global Services does hereby certify that an independent assessment has been conducted on behalf of:

Conneaut Leather

494 East Main Road, Conneaut, OH, USA

For the following product(s):

Upholstery:

Catalina, Catalina II, Davenport, Harmony Eco, Hospitable Hides Eco, Jetsetter Aircraft, Old English, Outback, Parisianne, Napa, Showcase Eco

This product meets all of the necessary qualifications to be certified for the following claim:

Indoor Advantage™ Gold

Indoor Air Quality Certified to SCS-EC10.2-2007

Conforms to California Specification 01350 (Standard Method v1.1, effective January 1, 2012) for the private office parameters¹.

¹ Modeled Product Type: Upholstery

Registration # SCS-IAQ-02123

Valid from: December 8, 2012 to December 31, 2013

ANSI ACCREDITED PROGRAM
PRODUCT CERTIFICATION
#0821

A handwritten signature in blue ink that reads 'Robert J. Hrubes'.

Robert J. Hrubes, Ph.D., Executive Vice President

CDPH/EHLB/Standard Method V1.1 (February 2010): CA 01350, Classroom Pupil Seating and Private Office

Parameter	Unit of Measure	Parameter Value	
		Classroom	Private Office
Dimensions & Area			
Room Volume	m ³	231	231
Upholstery Surface Area	m ²	11.14	150.39
Ventilation Rate	m ³ / hr	191	191
Total Pupil Seating Units	unit	27	2

The modeling parameters identified under California Specification 01350 (Standard Method v1.1) do not provide guidance on classroom or private office scenarios for upholstery. California Specification 01350, Section 3.10.2.1 allows for building concentrations to be calculated on a case-by-case basis using input parameters for the amount of installed products, the size of space, product surface area, and air change rate. An alternative modeling scenario was used, as allowed by Section 8.4.2: Guidelines for Use of Standard Method as Basis for a Building Product Claim. Conneaut Leather provided upholstery loading parameters based on customer seating specifications. For the school classroom scenario, the seating square footage was multiplied by 27 units for the modeling scenario, per CA 01350. For the private office scenario, the seating square footage was multiplied by 2 units for the modeling scenario, per CA 01350. The maximum surface area of seating was based on the data provided by Conneaut Leather for the largest seat used by their top ten customers. An assessment was completed for a classroom scenario consisting of 27 student seatings with leather upholstery and a private office scenario consisting of a typical seat for two persons.
